

MSF COGENERATION PLANT CIVIL WORKS, SHED PAD EXTENSION, VARIOUS WORKS

fgf has been awarded various civil works with MSF Sugar including civil works for the Power Co-Generation plant, shed pad extension and access culverts.

These projects included the following:

MSF Co-Generation Plant Early Works

- Bulk earthwork excavation of approximately 4,750m³. This included carting material to fill areas including a temporary perimeter road and the bone yard pad
- Bone yard clearing, stripping and bulk earthworks of approximately 3,930m³. These levels are filled using materials won/carted from the above excavation.
- Clearing, stripping and bulk earthworks of approximately 2,660m² of perimeter access road. Filling by using the materials won/carted from excavation above to formation.

MSF Shed Pad Extension and Access Culvert

- Construction of shed pad (approx. 200m²) including stripping, shaping and filling from onsite borrow source and compacting.
- Installation of 375dia access culvert

Various Works

- Carpark and access road
- Shed pad and road lighting trench
- Various other earthworks
