SPRINGMOUNT LEACHATE POND CONSTRUCTION

Fgf carried out the construction of the Springmount Waste Management Facility Leachate Pond. The scope of this project involved the following identified activities:

Earthworks

- Erosion, sedimentation and environmental control
- Site clearing, grubbing, topsoil stripping and stockpiling
- Bulk earthworks, trimming & grading
- Revegetation

Pond Construction

- Clay fill
- Supply, Installation of drainage pipelines and outlets
- Protection lining
- Concreting

Erosion and Sediment Control

- Plan and implement Erosion and Sediment Control measures

Project opportunities and challenges included:

- Project complexity (challenging construction program, wet season works, coordination with other trades packages)
- Proactive relationship management with many stakeholders
