

2014 NDRRA KURANDA SEALED ROADS

fgf delivered road works and civil works for the 2014 NDRRA Kuranda sealed roads project. This involved restoration works of 23 roads in the Tablelands area.

The scope of this project involved the following identified activities:

- Identification of Services and liaison with Services Providers
- Traffic Management
- Environmental Management
- Grading of longitudinal drainage
- Pavement Excavation
- Treating Subgrade
- Supply of pavement material
- Construction of new pavement
- Bitumen Surfacing
- Replacing road edge guide posts
- Reinstating line marking

Project opportunities and challenges included:

- Material was sourced locally from Toprock Quarry for the duration of the project due to its central location to the project which reduced travel times thus providing no hindrance to the construction timeline.
- Number of small sites spread out over large areas requiring regular movement and establishment of Construction Plant and Traffic Control.

Unit 5, 2 James Street
North Cairns, QLD 4870
